REQUESTED ANALYZES			
ANALYSIS	METHOD		ANALYSIS
<input type="checkbox"/> *Tensile testing - Part 1: Method of test at room temperature	TS ISO 6892-1		<input type="checkbox"/> *Estimation of average grain size
<input type="checkbox"/> *Brinell Hardness Test 2,5/62,5	TS ISO 6506-1		<input type="checkbox"/> *ICP-OES Elemental Analysis
<input type="checkbox"/> *Brinell Hardness Test 2,5/187,5	TS ISO 6506-1		Rockwell Hardness Test HRB
<input type="checkbox"/> *Amonnia Test For Stress Corrosion Resistance	TS 6957-1		Rockwell Hardness Test HRC
<input type="checkbox"/> *Dimensional Measurement	ASTM 1073/(In-House Method)ASTM 1087		Chip oil-moisture determination
<input type="checkbox"/> *Dezinfication Resistance Determination	TS EN ISO 6509- 1		SEM EDS Analysis
<input type="checkbox"/> *S-OES Elemental Analysis	TS EN 15079		<input type="checkbox"/> *Determination of total Cr,Cd,Hg,Pb by XRF
			TS EN 62321-3-1

SERVICE CONDITIONS
<ol style="list-style-type: none"> 1. Analyzes are made on the samples received.. 2. The samples will be brought in accordance with the acceptance criteria specified in the Analysis List. Samples that do not meet these criteria will not be analyzed and a new sample will be requested. 3. Only the analysis methods given above are used for analysis. 4. Changes regarding the conditions or the results of the study are notified in writing during the period of fulfillment of the analysis request. 5. After the request form is accepted, it replaces the contract. 6. Conformity assessment product standards will be taken into account. Products within the limit are considered as "OK", products out of the limit as "Not OK" and given in reports. 7. Measurement uncertainties will not be given in reports. If requested, please specify in the "NOTE" section below. 8. When a conformity assessment is requested based on the results of accredited analyzes; Conformity assessment is made on the basis of "Simple Acceptance (Shared Risk) Decision Rule". Therefore; test / analysis results are reported without including confidence level and measurement uncertainty. 9. (*)This parameter has been accredited by TÜRKAK in line with the TS EN ISO / IEC 17025 standard. 10. We accept, declare and undertake that the test and analysis results will not be used by mentioning the name of the laboratory in the advertisements and / or in a way that means that the product in question has been approved by the laboratory, otherwise the publication of the advertisements will be stopped by the laboratory and legal action will be applied for the compensation of material and moral damages. 11. After the request form is accepted, it replaces the contract. It is mandatory to submit the request form and analysis samples.

NOTE:		
We declare that we accept that the tests we request are made by the Sarbak Metal Quality Control Analysis Laboratory within the conditions given above and that we accept the price and payment terms to be applied for this service. All losses arising from the incomplete or inaccurate information we have declared above belong to us.
