

The company operates at the address of OSB GOP Mah. 8. Cad. No: 3 Çerkezköy /Tekirdağ with the title of Sarbak Metal Tic. Ve San. A.Ş. It conducts productive activities of manufacturing of Non-Ferrous Metals-Brass Rod (Solid and Hollow), Brass Profile, Brass Billet (Wedge), Brass Ingot.

Sarbak Metal conducts its production activities in accordance with the requirements of **ISO 9001:2015** Quality Management Standard in conformity with the current product standards.

Health and safety of the employees comes before Sarbak Metal's sense of continuing its activities without sacrificing quality. Therefore, it protects the health and safety of its employees without compromise at every stage of production with its **ISO 45001:2018** certificate and **ISO COVID-19:2020** certificate.

Sarbak Metal is aware that it is in constant communication with its customers, suppliers, subcontractors and employees during its production activity and that information exchange is as important as commercial exchange and it is a resource that needs to be protected. Therefore, it has **ISO 27001:2013** certificate and declares that the personal data of all its stakeholders are safe.

Sarbak Metal is aware of environmental risks faced by the whole world such as the decrease in the amount of water, global warming, and the depletion of energy resources. It is a company that has always shown the necessary sensitivity in the whole of its commercial life on environmental protection issues, taken precautions and set goals. A business organization's need for energy resources is too important to overlook. If there is anything more important than this, it is the fact that the energy sources that are mostly used are not everlasting. As Sarbak Metal is aware of this fact, it has been conducting the **ISO 14001:2015** Environmental Management System (EMS) for years. Within the scope of EMS;

- An Environmental Policy has been prepared and shared with all stakeholders on the website www.sarbak.com.tr
- It has determined the Environmental Objectives and it monitors them monthly within the scope of EMS.
- Critical Environmental Aspects have been determined; it regularly monitors the position of the company on these issues and shares its annual reports on its website www.sarbak.com.tr
- National and international legal requirements are followed within the scope of EMS, activities are carried out and actions are taken for the applications within the scope.
